FAST AND EASY AUDITS

WITH PRESAGE DIGITAL DATA COLLECTION

A STRONG FOOD SAFETY PROGRAM ISN'T ENOUGH! YOU NEED TO PROVIDE THE DATA TO BACK IT UP.

By storing records digitally in Presage, you can shorten a multi-day audit to a few hours. No more sifting through boxes looking for that one water-damaged, hand-scrawled record. With Presage's powerful data search feature, you can find records in seconds! Simply enter a date range and the type of record you are looking for, and it will be in front of you in seconds.

But a good audit doesn't start when the auditor walks in the door; it starts with preparation! Using our Saved Search feature, you can stage the data you know you will need to provide. When the auditor is ready to review your data, you can provide an up-to-date set of results in two clicks!

For Quality Managers who cover multiple plants, you can help your plant-level staff be audit-ready by creating a template available across all plants. Consistency is key!

SCHEDULE A DEMO TODAY!

You can tell us the frustrations you face with your current systems. We'll walk you through the improvements Presage Analytics can help you achieve.
